

What do we do?

GENEMEK is a combination of three words; **GEN** was the original name for our company in early years. **E** stands for electronics(elektronik) and **MEK** stands for mechanics(mekanik). So **GEN+E+MEK** represents our expertise in manufacturing the products that seamlessly integrate the electronic and mechanic parts. GENEMEK has been using large amount of its resources for Research & Development department to create and design new and innovative products. We have been designing and manufacturing elevator interface components for 25

years. Wide range of ultra thin panels , full height & half height and even horizontal COPs, surface mounted or flush mounted LOPs, scalable panels. Various products that support parallel, parallel - prewired and CANbus communication systems, operating panels and accessories for new installations and elevator modernizations.

With 25 years of experience, We design and manufacture electromechanic products in-house.

- 1999** - Established to design and produce electromechanical parts
- 2000** - Design of infrared security curtain for automatic doors
- 2001** - Programmable LED - LCD position indicators
- 2002** - Security device for elevators
- 2003** - Programmable door chimes
- 2004** - Accumulator charging devices, two-wire position indicators
- 2005** - Prewiring systems for landing and car operator panels
- 2006** - Surface mount assembly line
- 2007** - Solution provider for prewired installations
- 2008** - First production of mechanical parts in-house
- 2009** - Designing plastic injection and deep drawn mouldings
- 2010** - Tool making, CNC, EDM
- 2011** - Ultra thin surface mounted LOP and COP series, AVOX
- 2012** - Sheet metal processing and injection moulding machines
- 2013** - Increased capacity, full automatic SMT production line
- 2014** - Prewiring systems, CANbus
- 2015** - Increased capacity new plastic injection moulding machines
- 2016** - LASER cutting / CNC bending
- 2017** - High performance color TFT
- 2018** - Ultimate information system, PETRA
- 2019** - Integrated floor position and status indicator
- 2020** - Development of MEGA7 COP series
- 2021** - Design of R36 button series
- 2022** - Introduction of XPAND systems
- 2023** - Development of MEGA5 COP series
- 2024** - Introduction of PANDA dot-matrix COP series
- 2025** - Launch of VIORA COP and LOP series

LOP coding example

Description

CDD LED matrix floor position indicator and CKS keyboard module are made for elevator controllers which uses serial (CANbus) communication. Simple plug and play connection structure needs no time to spend on electrical and mechanical installation. CKS keyboard modules are connected to CDD.

Features

- 16×10 LED matrix display
- Integrated Emergency light function (via AV-BLT)
- Integrated elevator ID function (via AV-BLF)
- Built-in Two-way intercom
- CANbus, serial prewired type connection
- 2-30 stops
- EN81-70, EN81-28 compliant
- Versatile, cost-effective, flexible design

Description

Dual 4.3" full color TFT floor position and information panels for elevator controllers which use serial (CANbus) communication. Simple plug and play connection structure needs no time to spend on electrical and mechanical installation. CKS keyboard modules are connected to CT4D. Lower TFT screen can be useful to show extra information respecting current floor position in graphics and text. Customer can change these images with use of SDCARD and given PC software.

Features

- 4.3" indication area,480x272px 24 bit TFT color indicator
- Polycarbonate lens cover
- RGB, changeable pictures for each floor
- Integrated Emergency light function (via second TFT)
- Built-in Two-way intercom
- Integrated elevator ID function(via second TFT)
- 2-30 stops
- CANbus, serial prewired type connection)
- EN81-70, EN81-28 compliant
- Versatile, cost-effective, flexible design

Description

DSC floor indicators are simple and cost effective solution for all parallel type elevator controllers. Direct LED inputs will result to show respecting floor position information with using 7 segment mapped digits. Special letters like G P L R B can be shown if your elevator controller is capable to give out respecting outputs. Separate arrow shaped illuminated symbols can indicate travelling direction. Maintenance and overload situations can also be shown with use of illuminated symbols.

Features

- 9.9mm surface mounted
- Parallel type connection
- Indicate -9 till 19
- EN81-70, EN81-28 compliant
- Cost-effective

ANTERA – Full and half height surface mounted car operator panels. Color TFT, LED matrix and 7 Segment LED - integrated floor position and status indicator for elevator controllers with serial (CANbus) communication.

RADIAN series premium quality push buttons and fixtures are used in ANTERA for more flexible and robust design. Suitable for most elevator applications. XPAND serial to parallel button interface module is used for tidy and clean installation.

Features

- Customizable height as required size
- Suitable for elevators up to 18 stops (EN81-70) or 28 (EN81-20)
- Fast and reliable installation
- Buttons with protruding symbols
- CNC Laser + bending, stainless steel framework
- MEGA7 LED matrix, 7 Segment, TFT color display options
- Fan button with two contacts, timer and blinking lighting
- Decorative surface finishes available

Description

HVAT is a premium, slim, and durable car operator panel that delivers a scalable solution for modern elevator systems. Featuring a surface-mounted design available in full or half height options, it integrates MEGA5 LED matrix or MEGA7 technology with Color TFT, LED matrix, or 7-segment versions to provide clear floor and status information. Uses CANbus. Compatible with a wide range of elevator controllers, HVAT ensures long-lasting performance and seamless integration in demanding environments.

Features

- Customizable height as per request
- Suitable for elevators up to 12 stops
- Fast and reliable installation
- Buttons with protruding symbols
- CNC Laser and bending, stainless steel framework
- MEGA5/7 LED matrix, 7 Segment, TFT color display options

Description

AVOX is ultra thin surface mounted landing operator panel series which is most popular and well-known in our product range. No visible bolts or screws due to smart snap fit design in the front panel. LED & TFT indicators with AVOX buttons are used in 9.9 mm slimcase which has tapered down to sides to even make a thinner look.

AVOX serial CANbus prewired landing operator panels are developed for fast and easy installation. Supports plug & play type connection with wide range of well-known elevator controllers via CANbus. Thus eliminates the wiring labor in a 9.9 mm slimcase. Serial AVOX LOPs have variable indicators such as 7 Segment & LED matrix and color TFT.

Features

- Surface mounted, no screws for cover installation
- 9.9 mm ultra thin slim casing
- EN81-70 and EN81-28 compliant
- Decorative finishes available
- CANbus serial prewired type connection

AV.2022

Description

ANTERA - surface mounted landing operator panels. Comes in several set sizes. Suited with 7 segment, LED matrix or TFT indicators. Both parallel and serial CANbus compatible. RADIANT and QUAD series premium push button options available for parallel type.

Features

- Scalable in height, which allows a variety of fixture combinations.
- Optimal AVOX series, or premium RADIANT or QUAD button options.
- Protruded button symbols for accessibility purposes
TFT, Graphic LCD, 7 segment or LED matrix indicators
Decorative surface finishes

Description

ECLASER – flush-mounted landing operator panels. 2 mm thick stainless-steel front panel. The model maintains a clean appearance on the mounting surface. All electronic components are well organized and safely hidden inside the back box. Supports 7 segment, LED matrix and Graphic LCD indicators. Equipped with premium quality RADIANT and QUAD push buttons. Proven design ensures easy installation.

Features

- 2 mm thick stainless steel plate
- Premium quality RADIANT or QUAD buttons
- Protruding symbols
- 7 segment, LED matrix and Graphic LCD indicators
- Decorative surface finishes available
- Scalable on special request

Description

HVAT is a premium landing operator panel designed with a sleek, ultra-slim 10 mm profile and a smart snap-fit front panel that hides all visible screws, delivering a clean and modern appearance. It supports a wide range of display options including 7-segment, LED matrix, color TFT, and LCD, and is fully compatible with both parallel and CANbus elevatorsystems. HVAT is scalable in size and configuration, allowing flexible adaptation to various architectural needs. Its plug-and-play structure ensures fast installation, while the durable build guarantees long-lasting performance in all environments.

Features

- Scalable in height and width. Allows combining several fixtures within the same body
- Protruding symbols for people with poor eyesight
- TFT, LCD, 7 Segment or LED matrix indicator options
- Decorative surface finishes available

Dimensions

Height=200-400 mm
Width=65, 80, 100, 120, 150, 180 mm

Description

RETINA is the new ultra-thin surface mounted landing operator panel in our product range. New flat and clean design on front view and black & frosted white contrasting colors on sides make a modern and thin look. Built - in high implementation quality with 7-segment LED & LED matrix indicators. Serial prewired type connections are available.

Features

- 9.9 mm thin design, surface mounted
- 7 Segment or LED matrix display indicator
- Serial prewired systems are supported
- Custom logo laser marking available (Optional)

Description

UFO is a series of surface-mounted landing operator panels and indicators. The main design feature of the series is the circular form, one of the most fundamental shapes. The slim housing, absence of visible fastening elements, variety of decorative finishes - all these features make the series the most natural choice for a range of design solutions.

Features

- 100mm diameter round steel frame
- Wide range of components
- 9.9mm ultra thin, surface installation
- Snap fit design, no visible bolts or screws
- Decorative surface finishes available

Description

AVOX ultra-thin push buttons are designed to integrate seamlessly with AVOX COPs and LOPs. Four LEDs evenly illuminate the transparent button icon and outer ring. The smart button body design eliminates the need for mechanical spring loading while still generating the required force to meet EN81-70 standards. The locking mechanism requires no screws and allows for easy attachment or detachment. High-quality tact switches ensure a long lifespan. Available in various numbers, letters, and icons, as well as different circuit types.

Features

- Even lighting with four LEDs
- Protruding symbols for accessibility purposes
- Durable silicone plunger of the tact switch
- Optional braille bumps, buzzer sound

Description

QUAD buttons are square-shaped, premium-quality push buttons designed for use with various COPs and LOPs. Eight LEDs evenly illuminate the transparent button icon and outer square frame (when braille is present, the raised dots are also illuminated). The spring placement and mechanical design ensure the required force to meet EN81-70 standards and allow the button to function even when pressed from the very corner (a rare feature). The locking mechanism requires no screws and allows for easy attachment or detachment. High-quality tact switches ensure a long lifespan. Available in various numbers, letters, and icons, as well as different circuit types.

Features

- Even lighting via eight LED elements
- Protruding symbols for accessibility reasons
- Matte chrome-plated ABS body
- Durable silicone plunger of the tact switch
- Optional braille bumps, buzzer sound
- Variety of circuits (optional)

Description

RADIAN (or R36) new-generation push buttons designed for use with ANTERA, EPAK, FUSION, ECLASER, and other COPs and LOPs. Chrome-plated metal body. Four LEDs evenly illuminate the transparent button icon and outer ring. Raised symbols and braille dots. The elaborate button design incorporates silicone spring mechanics that ensures the required force to meet EN81-70 standards. Fixed with a nut, allowing compatibility with steel plate thicknesses from 0.8 to 2.0 mm. High-quality tact switches ensure a long lifespan. Available in various numbers, letters, and icons, as well as different circuit types.

Features

- Even lighting with four LEDs
- Protruding symbols for accessibility reasons
- Durable silicone plunger of the tact switch
- Optional braille bumps, buzzer sound
- Variety of symbols
- Decorative surface finishes available

Description

Watson is a general-purpose Radio Frequency Identification (RFID) access control unit. This RFID card reader features two separate relay outputs that can be used for two different administrative purposes simultaneously. Up to 100 RFID card data entries can be stored in non-volatile memory. Due to its thin design, the module can fit in AVOX or HVAT car and landing operator panels. Watson can be easily programmed using on-board push buttons. End users can create their own Administrator Card to add new cards to the unit's memory.

Features

- 2 separate dry contact relay outputs
- Memory up to 100 RFID cards (cards not included)
- ISO/IEC 14443 A and ISO/IEC 14443 B
- Non-volatile memory
- LED lights to indicate the status of the module
- Programmable by three on-board push buttons
- Programmable by the end user by using Administrator Card
- On-board buzzer
- Compatibility with AVOX and HVAT series 9.9mm thin design
- Firmware and cards database update via SD card

LED LEGEND

- Access denied
- Access granted
- Standby mode
- RFID card is being recorded to memory
